

LVM44 - BUD ICE CO. - The end bunkers in all refridgerator cars had to be filled with ice to keep their contents from spoiling. Build this icing platform to take care of your reefers. All parts are precut to size. Instruction sheet is loaded with drawings to aid in assembly. Bud Ice Co. takes up an area 3 1/2" x 39" and can accomodate four reefers. Ice and loading shutes are included in the kit.

LVM45 - PALACE POULTRY CAR -

These cars were built to ship live poultry which was kept in 120 coops. Hinged trapdoors in the car roof were for access to the watertank and also for additional ventilation during the hot weather. The coops were stored on shelves in the screened area. the attendant lived in the enclosed area above a large feed bin. A green and white conversational piece. Easy to build. Specify Scale or Hi-Rail.

LVM46 - MILWAUKEE HORIZONTAL RIBBED BOX CAR - A completely different 40' box car from the usual was built after the Great Depression using welded side ribs to strengthen the side sheets and make more room in the car interior. Complete with Scale or Hi-Rail trucks and couplers. All parts are precut to size whenever possible and instructions with drawings make for easy assembly.
